OMKAR ASHOK GURAV

Pune, Maharashtra, India • +91 8329650472 • guravyash649@gmail.com • **linkedin.com/in/omkar-gurav-a494b7224** • **github.com/OmkarGurav21**

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2.5+ years of verified industry experience architecting real-time systems, scalable backend services, and responsive web applications across enterprise MNC (Cognizant) and agile production environments. Proficient across **Java (OOP, Multithreading, DSA), Python (Concurrent Services, MQTT), Node.js (Express, WebSockets), PostgreSQL, MySQL, and React.js**. Demonstrated history of building IoT telemetry ingestion pipelines, real-time bi-directional WebSocket engines, and relational schema architectures with Dockerized container deployments.

CORE TECHNICAL SKILLS

Backend & Languages:	Java (Core Java, OOP, Collections, Multithreading), Python (Threading, Bridge Services), Node.js, Express, PHP
Frontend Engineering:	React.js, TypeScript, JavaScript (ES6+), TanStack Query/Router, HTML5, CSS3, Tailwind CSS, Radix UI
Databases & ORMs:	PostgreSQL, MySQL, Neon Serverless, Drizzle ORM, Supabase, JDBC, ACID Transactions, Indexing & Query Tuning
Real-Time & Architecture:	Socket.io (WebSockets), MQTT Protocol (Mosquitto), RESTful APIs, Event-Driven Architecture, Microservices basics
DevOps & Testing:	Docker, docker-compose, Git, GitHub, Maven, Postman, Chrome DevTools, Automated Testing (Selenium WebDriver)

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Systems Engineer | Garix — **Pune, India | 07/2026 – Present**

- **Architected full-stack real-time web applications** including a live hospitality ordering system powered by **Node.js, Express, PostgreSQL, and Socket.io WebSockets**.
- **Built backend data models with Supabase and relational schemas**, establishing Row-Level Security (RLS) policies, JWT authentication, and optimistic state synchronization in React frontends.

Full-Stack Software Engineer | KWS (Karve Web Solution) — **Pune, India | 12/2024 – 07/2026**

- **Engineered Apex IoT Telemetry Bridge** connecting industrial IoT hardware via Mosquitto MQTT to dashboard REST APIs; wrote multi-threaded Python listeners and containerized deployment with Docker.
- **Implemented Drizzle ORM and Neon Serverless PostgreSQL backends** for high-volume commercial applications, eliminating manual SQL bottlenecks and accelerating query execution.
- **Re-architected legacy web platforms into modern, high-speed architectures** (MIS Education, 50+ pages), cutting latency by **50–70%** and mentoring 8–10 junior engineers across full-stack deliverables.

Software Engineer (Automation & Systems QA) | Cognizant — **Pune, India | 02/2023 – 11/2023**

- **Developed automated regression test harnesses in Java** utilizing OOP and TestNG, achieving a **75% reduction in manual verification effort** across client platforms (including Rediffmail).
- **Engineered insurance plan comparison logic** with dynamic multi-criteria filtering and algorithmic sorting across 20+ plan tiers.
- **Conducted end-to-end integration verification** between front-end UI components, backend APIs, and database transaction states.

FEATURED FULL-STACK & SYSTEMS PROJECTS

Apex IoT Real-Time Telemetry & Event Bridge | Python, Mosquitto MQTT, Docker, MySQL — **Production IoT Bridge**

- Architected an asynchronous telemetry forwarding service subscribing to MQTT sensor topics, transforming JSON payloads, and streaming to dashboard REST endpoints. Integrated concurrent threading for offline device detection.

Real-Time Hospitality & Order Management Platform | React.js, Node.js, Express, PostgreSQL, Socket.io — **github.com/OmkarGurav21**

- Engineered an end-to-end contactless ordering engine with bi-directional WebSocket state updates. Built PostgreSQL database schema handling concurrent customer cart transactions and live kitchen display synchronization.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science — Sinhgad College of Science, Pune — **Graduated: 2022 | GPA: 7.75 / 10.0**

Data Structures & Algorithms Specialization — UC San Diego & HSE University — Algorithmic problem-solving, graph algorithms, asymptotic complexity

Java Programming Masterclass — Tim Buchalka — Core Java, Collections Framework, Multithreading, OOP Architecture
